

# Using money for shopping

## Animation script

Hello again, everyone. Thank you for all your help planning purchases for the vegetable patch. Now it's time to go to the shop using the cash to buy what we need to get planting.

Look how much the vegetables have grown, and I need your help again, this time to harvest the vegetables. Harvesting is where we pick and gather the vegetables that are fully grown and ready to be eaten. We will need a spade to dig up the potatoes and some containers too.

We'll need to buy a few more things to help us. This time, instead of going to a shop we are going to use a debit card to shop online. A debit card is a bank card that can be used instead of cash when making purchases, which takes money directly from a bank account when the payment is made. Unlike cash, we won't be able to see or touch the money that we are spending, so it's especially important to plan what we'd like to buy and how much it is going to cost.

The school has put £10 in my bank account to use for the harvesting.

Now it's your turn to help me decide what to buy and order to harvest the vegetables. Remember you can only spend the available money in my account and think carefully about which items are needs and which are wants – good luck everyone.
